

# REMOTE TIMER BOX

# ACTIVE FILTRATION line of filtration equipment

a product by Elite Manufacturing Specialists

Our remote timerbox allows complete control of our AF-3000E, AF-4500E, and AF-2000E unit at ground level to include on/off, and speed changes just like the standard units box, with the addition of a timer allowing for the unit to run for a set time to guarantee that all of the particles in the air will be captured.

This replace the standard switch box with the larger one to accommodate the timer.

Hanging procedure is simple and involves loosening both screws on the edges of the front plate. Then the front plate with switch and timer can be lifted to reveal 4 different mounting holes in the back of the unit.
