

# Pre-Filter Pads

## ACTIVE FILTRATION line of filtration equipment

a product by Elite Manufacturing Specialists

Active Filtration units can be configured with a pre-filter pad. The benefit of this light and inexpensive low MERV rating filter is providing lengthened filter life. The pre-filters are particularly great for areas that deal with a lot of large particles like sawdust and general dust.

The filter is held in place with the side holders. Simply stretch the pre-filter pad over the holders and push the filter into the holders.

Pre-filter pads are made to catch large particles like textile fibers, spray paint dust, sanding dust, saw dust and dust particles.

Additional pricing per unit	
Dual Intake Units	\$125
Single Intake Unit	\$65
